---

## WORK EXPERIENCE

---

### Accenture

Sep. 2022 – May 2023

*App Development Associate*

*Bangalore*

- Worked with multi-national teams to build custom service solutions for precision weight instruments.
- Handled several P1 incidents and resolved them under tight SLA to restore business operations

### Freelance Web Developer

Aug. 2023 – Current

- Collaborated with several small businesses to build and launch custom websites tailored to their brand and goals
- Set up and configured Shopify stores, including product uploads, theme customization, and payment integration, using both traditional themes and headless architecture with **Shopify Hydrogen**
- Developed headless CMS solutions (e.g., Contentful) to streamline content management and enable dynamic site updates

## EDUCATION

---

### Sona College of Technology

June 2022

*Bachelor of Engineering*

- **CGPA: 8.14**
- Hosted a college-level **hackathon**, coordinating with sponsors, mentors, and participants to organize a 24-hour coding event with over 50 participants.

## SKILLS

---

### Front-End

- **JavaScript:** Proficient in ES6+, DOM manipulation, and modern frameworks
- **React:** Experienced with hooks, component-based architecture, and state management
- **Next.js:** Hands-on experience with server-side rendering (SSR), static site generation (SSG), and API routes for building performant web applications
- **HTML/CSS:** Strong understanding of semantic HTML and responsive design
- **Tailwind CSS:** Skilled in utility-first styling and custom UI design

### Backend

- **Node.js & Express.js:** Building RESTful APIs and handling basic server-side logic

### Tools & Workflow

- **Git & GitHub:** Version control and collaborative development
- **npm:** Package management and script automation
- **Webpack:** Configured and optimized builds for production-ready applications
- **Vite:** Fast development server and bundler for modern front-end projects

### Testing

**Jest:** Writing unit and integration tests for JavaScript applications

**Vitest:** can write efficient tests in Vite-based projects for frontend validation

**React Testing Library:** Testing UI components with a focus on user interactions.
